Keep your GRP fabrication machinery in peak condition

Approved Machine Servicing

Our machine servicing options are designed to help you get the most efficient long term use and peak performance from your **GRACO, MVP & IRAC** GRP production equipment – keeping your machines well maintained also helps to cut your running costs.

Our service covers key elements of the machine, including:

- *Spray gun (full service)*
- *Resin pump power head & wet end (full service)*
- *Resin accumulator & filter (full service)*
- *Catalyst pump, accumulator & feed system (full service)*
- *Resin, Catalyst, Air & Flush hoses (Inspect & Report)*
- *All packing, seals, O rings & consumable items are inspected & replaced (where necessary)*

“recommended for our after care & service options”

Our technicians examine and service all equipment in accordance with the manufactures strict recommendations. We then fully test your machine to complete the service.

How you'll benefit:

- *Your machines will run more efficiently*
- *You will cut down on waste & materials costs*
- *Better operation produces better end products*
- *Your machine will keep working for longer*
- *30 day guarantee on all parts & labour*

“service is quick & efficient; machines fully serviced & tested for peak performance”

Book your fixed-price machine service from £395.00* + VAT

*per machine, per visit - Includes all travel and subsistence expenses.
